KEY ADVANTAGES

- Three-in-one indoor use: cooling, heating and dehumidifying.
- Three installation modes to manage air according to the room: indoor with air recirculation (standard), indoor with fresh-air intake (dual-flow via the accessory), outdoor with ducted air supply (included).
- Powerful refrigerated air system designed to cool the room atmosphere when required.
- Dehumidified and filtered air cycle to improve the breathing environment.
- Automatic condensate evacuation enables extended operation without regular manual draining.
- Easy movement from room to room thanks to integrated castors.

Outdoor installation with ducted air supply.
